

**Northwestern School Corporation**  
**Monthly Wind Turbine Production Report**  
**December 2018**

In December 2018 the turbine electric production was **78,391 kWh**. On the electric bill we received in December for the main campus the average cost per kWh was **\$0.0973**, therefore the December production will result in an approximate **\$7,627.644 reduction** in our electric bills. Part of this reduction will come from power we produced and used, the other part of the reduction will come from a credit on our electric bill.

COMPARED TO PREVIOUS YEARS

December 2017	<b><u>192,114 kWh</u></b>
December 2016	<b><u>185,614 kWh</u></b>
December 2015	<b><u>219,898 kWh</u></b>
